SUMMARY

Frontend developer focused on building responsive, high-performance React applications with strong UI/UX design principles. Transitioning into Full-Stack (MERN) development with hands-on practice in building real-world dashboards, authentication systems, and interactive tools. Familiar with modern SaaS aesthetics and scalable frontend component architecture.

EXPERIENCE

Ghackk Technologies

Oct. 2025 – Feb. 2026

UI/UX Intern

Remote

- Designed and contributed to pre-launch product concepts including **Padhantu** (an EdTech platform for grades 6-10) and **NotedWork** (a transparent workplace review ecosystem).
- Conducted user research and competitor analysis, translating data insights into actionable, user-centered design decisions.
- Created wireframes, user flows, and high-fidelity prototypes using Figma, applying strict grid systems for consistent layouts.
- Collaborated with cross-functional team members in a remote environment, ensuring smooth communication and rapid iteration.

PROJECTS

CRM Employee Management Dashboard | React, Redux Toolkit, Tailwind CSS

- Links:** [Live Demo](#) | [GitHub Repo](#)
- Built a responsive admin dashboard to manage employee data, featuring persistent login logic and workflows.
- Implemented global state management using Redux Toolkit to handle scalable employee data efficiently.
- Engineered advanced filtering, search, pagination, and integrated analytics charts for performance visualization.
- Designed reusable UI components (tables, cards, modals) and optimized interfaces for cross-device responsiveness.

Kanban Board Task Manager | React, Tailwind CSS, DnD Kit

- Links:** [Live Demo](#) | [GitHub Repo](#)
- Developed a Trello-style drag-and-drop management system with multiple interactive columns.
- Handled complex state synchronization for real-time task movement, including add, delete, and update functionalities.
- Implemented data persistence using browser `localStorage` to maintain user workflow state across sessions.

CRM Dashboard Website (Landing Page) | React, Tailwind CSS, Framer Motion

- Links:** [Live Demo](#) | [GitHub Repo](#)
- Engineered a modern, high-contrast landing page utilizing contemporary SaaS style design patterns.
- Integrated smooth scroll transitions and interactive UI elements using Framer Motion to enhance user engagement.

MERN Stack Mini-Projects | MongoDB, Express.js, React, Node.js

- Links:** [GitHub Repo](#)
- Developed multiple full-stack applications focusing on authentication, CRUD operations, and Role-Based Access Control (RBAC).

SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

State Management: Redux Toolkit, Context API

Tools & Workflow: Git, GitHub, Vite, Postman, MongoDB Atlas, Figma

Core Concepts: Component Architecture, REST APIs, Performance Optimization, UI/UX Principles

EDUCATION

Shaheed Bhagat Singh, University of Delhi

Bachelors in Commerce

Graduation: May 2026

New Delhi, India
